

OER4All

User Testing

We appreciate your participation in this test of the User Experience on two Open Educational Resources websites: [OER4All](#) and [OER Commons](#).

Please make your evaluation of the use and interaction on OER4All and OER Commons by filling out the following questionnaire after the completion of these tasks on both websites.

Task 1. Search for resources with the keyword "global warming". Annotate the number of resources in search results.

Task 2. Search and retrieve the resource entitled "Is Earth warming?" on the search results list and identify the first phrase of the resource content.

Annotate the time required for completion of each task on each website. If the task is abandoned annotate the time elapsed until then.

The questionnaire consists of pairs of contrasting attributes that may apply to the website. The gradations between the opposites are represented by numbers from -3 to 3 from very bad to extremely good opinion about the issue. The value 0 shows a neutral opinion. Please mark the value that most closely reflects your impression.

[OER4All](#)

Task 1. Search for resources with the keyword "global warming". Annotate the number of resources in search results.

Time for completion:

Time for abandon:

Number of resources in search results:

Task 2. Search and retrieve the resource entitled "Is Earth warming?" on the search results list and identify the first phrase of the resource content.

Time for completion:

Time for abandon:

First phrase of the resource content:

QUESTIONARIE. Valuate each question with a value between -3 to 3.

- Perspicuity: Is it ease to learn how to use the website?

Q1. How easily do you learn the use of the website?

difficult to learn	-3	-2	-1	0	1	2	3	easy to learn
--------------------	----	----	----	---	---	---	---	---------------

Q2. How understandable is the structure of the website?

not understandable	-3	-2	-1	0	1	2	3	understandable
--------------------	----	----	----	---	---	---	---	----------------

- Efficiency: Can user resolve the tasks on the website without unnecessary effort?

Q3. How efficient is the navigation in relation to your purpose on the website?

inefficient	-3	-2	-1	0	1	2	3	efficient
-------------	----	----	----	---	---	---	---	-----------

Q4. How easy is the process on the website for the achievement of the task?

complicated	-3	-2	-1	0	1	2	3	easy
-------------	----	----	----	---	---	---	---	------

- Dependability: Does the user feel in control of interaction on the website?

Q5. How predictable is the control of interaction on the website?

unpredictable	-3	-2	-1	0	1	2	3	predictable
---------------	----	----	----	---	---	---	---	-------------

Q6. How do you feel about the control of interaction on the website?

not secure	-3	-2	-1	0	1	2	3	secure
------------	----	----	----	---	---	---	---	--------

- Accessibility. How adequate is the website for your particular requirements about accessibility?

Q7. How do you feel the supporting about your accessibility requirements on the website?
