1. How to avoid plagiarism

When writing an academic paper, it is essential to clearly identify which ideas or data have been taken from other sources and which are the author's own product. With this topic you will learn how to make an ethical use of information and avoid any kind of plagiarism.

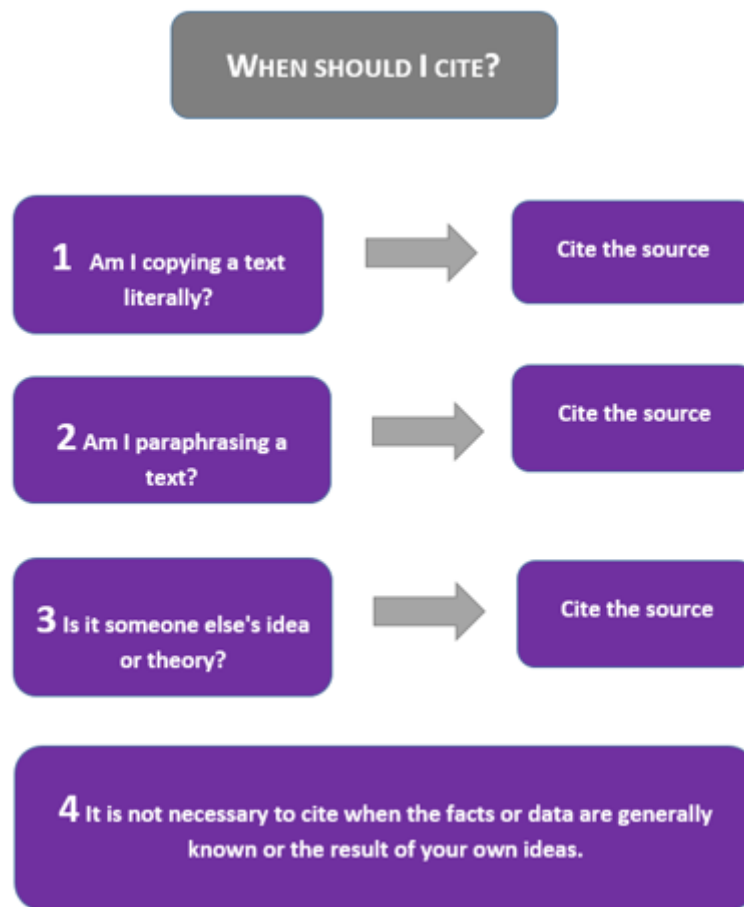

When you use someone else's words or ideas without mentioning them, you are committing a type of theft called **plagiarism**.

<< Plagiarism may consist of presenting as one's own a document prepared by another person, but it is also plagiarism to copy or paraphrase ideas or texts from other sources and include them in one's own work without indicating who the real author is.

In Spain, authorship rights are protected by the [Intellectual Property Law](#). You can find more information about plagiarism and copyright on the [Intellectual Property](#) web page prepared by the Library.

 To avoid plagiarism, whenever you use what someone else has said or when you summarize or paraphrase information found in books, articles or web pages, you must always **indicate the source** by means of a **citation within the text** and its corresponding **reference** in the list of references, which is usually placed at the end of the paper.

In the following image you can see in which cases you must cite your sources:

Correctly citing the sources consulted for the preparation of our work allows us:

- Acknowledge the work done by other authors.
- Avoid plagiarism.
- Make it easier for anyone to locate the sources of information used to support our work.
- Give credibility and consistency to our work.

There are different **citation styles**: some are specific to certain disciplines and others are used only in certain scientific publications.

! In this unit we will describe the characteristics of one of the main citation styles in the scientific field: **the Chicago style**.

2. Basic concepts

In order to prepare your paper, you must be clear about some basic concepts, such as **citation**, **bibliographic reference** and the difference between **reference list** and **bibliography**. To do so, we recommend that you review the section [How to make citations and bibliographical references](#) on the BUA website. In addition, from that same page you can access the different citation styles available.

Bibliographic reference managers are tools that will support us in the task of documenting our work, inserting citations and generating bibliographic lists. You can find more information about bibliographic managers and their utilities in the page [How to manage bibliographic references](#) that BUA has elaborated.

3. Chicago Style

The Chicago Manual of Style is a style manual published by the University of Chicago. Its first edition appeared in 1906 and successive editions have been published since then, in order to adapt to the technological and Publisher's Name changes of each era. Seventeen editions have been published to date, the latest of which dates from April 2017.

The Chicago Manual of Style is divided into three main sections:

- A first section devoted to the editing process (chapters 1-4).
- A second section devoted to style issues: grammar, punctuation, spelling... (chapters 5-13).
- A final section devoted to the writing of citations, bibliographical references and indexes (chapters 14-16).

 In this unit we present the most significant aspects described in chapters 14 and 15 of the manual, which deal with the documentation of sources in papers.

4. Chicago's two systems of source citation

Chicago-style source citations come in two varieties: (1) notes and bibliography and (2) author-date.

The **notes and bibliography system** is preferred by many working in the humanities—including literature, history, and the arts. In this system, sources are cited in numbered footnotes or endnotes. Each note corresponds to a raised (superscript) number in the text. Sources are also usually listed in a separate bibliography. The notes and bibliography system can accommodate a wide variety of sources, including unusual ones that don't fit neatly into the author-date system.

The **author-date system** is more common in the sciences and social sciences. In this system, sources are briefly cited in the text, usually in parentheses, by author's last name and year of publication. Each in-text citation matches up with an entry in a reference list, where full bibliographic information is provided.

Citation system	Form of the citation in the text
Notes and bibliography	text ^{number of the citation in the text} Example: (...) punctuation marks and into which types they can be subdivided ⁴ .
Author-date	(Author's Last Name Year of publication) Example: (...) punctuation marks and into which types they can be subdivided (Cassany 1999)

Aside from the use of numbered notes versus parenthetical references in the text, the two systems share a similar style. Most authors choose the system used by others in their field or required by their publisher.

In this unit we will describe, first of all, the **system of notes and bibliography**, according to which when we cite the source we do so by indicating it with a number in the form of a superscript. We will also describe the **author-date system**, according to which when we cite the source in the text we do so by inserting the first two elements of the reference (author-year) in parentheses.

4.1. Notes and bibliography system

 In this system, **bibliographic citations are provided in notes**, preferably supplemented by a **bibliography**.

- The **notes**, whether footnotes or endnotes, are usually **numbered** and correspond to superscript note reference numbers in the text.

Example

In the text:

The relationship between story and novel has been raised numerous times. Julio Cortázar explained it this way: “La novela y el cuento se dejan comparar analógicamente con el cine y la fotografía [...]”.³

In note:

³ Cortázar, “Algunos aspectos del cuento”, 13.

In bibliography

Cortázar, Julio. “Algunos aspectos del cuento”. In *Antología del cuento moderno*, Cesar Cecchi and María Luisa Pérez, 13-22. Santiago de Chile: Editorial Universitaria, 1991.

- If the bibliography includes all works cited in the notes, the notes need not duplicate the source information in full because readers can consult the bibliography for publication details and other information. **Notes need only include a short form.**

Example

³ Cortázar, “Algunos aspectos del cuento”, 13.

4.1.1. Citations in the text

Here are some guidelines on how to insert quotations in the text according to the Chicago style system of notes and bibliography:

- When you paraphrase or summarize texts or ideas from other authors you must indicate the source by indicating it typographically at the end of the sentence by means of a **superscript**.

Example

By its structure, the letter allows the sender to direct the communication, often making use of the metatextual function, the metacommunication.⁴

- You should also typographically mark **short literal quotations**, which will be inserted in the text between quotation marks.

Example

[...] exposed by Iker González-Allende: “se dedicaban poemas mutuamente, se escribían prólogos para sus libros y mantenían correspondencia aún sin conocerse”.⁵

- In the case of **long quotations**, which occupy two or more paragraphs, they are not enclosed in quotation marks and are distinguished from the rest of the text because they have a larger indentation and the typography is different from the rest of the text. Also in this case the superscript will be placed at the end of the quotation.

Example

The gears of the reproductive structure protect them, but also define them because....

*The bureaucratic machine [...] needs a desire and produces it: the desire for bureaucracy or orderly administration of the world [...] which is confused with the desire for dependence: one wants to depend on the structure and loves it [...]. The bureaucratic machine produces a world of hierarchies.*⁶

- A note number should generally be placed **at the end of a sentence**, after the period.

Example

In this respect, Gutiérrez Merchán refers to the “intolerable intrusion of the institutions”.⁷

4.1.2. Notes

In the following sections we present some guidelines for writing notes according to the Chicago style:

- Note numbers
- Complete references in footnotes
- Shortened citations
- Use of *Ibid.*
- Citations plus commentary in a note
- Several citations in one note

Note numbers

- Note reference numbers in text are set as superior (superscript) numbers, but **in notes the numbers may appear as:**
 1. Superscripts followed by space.
 2. Full size and followed by a period and a space.

Example

In the text:

It is within the latter that the economic interests of production and financial groups exert strong pressure and, in their expansionist zeal, demand political backing to extend their influence beyond the borders of the economic community.⁸

In the note:

(Option 1)

⁸ Besné, Canedo and Pérez de las Heras, *La Unión Europea*, 173.

(Option 2)

8. Besné, Canedo and Pérez de las Heras, *La Unión Europea*, 173.

- **Notes**, whether footnotes or endnotes, **should be numbered consecutively**, beginning with 1, throughout each article and for each new chapter – not throughout an entire book unless the text has no internal divisions

Example

In the text:

An example of the first reaction is the German translation theorist W. Wilss, who sees a way out of stagnation in the broadening of the methodological perspective³⁸. He sees as a possibility the maximum explicitness of the analysis of the translation process, which incorporates the study of common translation problems³⁹ independent of a specific language pair (*competence in Translation*) into practical problems emanating from a specific language pair (*performance in Translation*).⁴⁰ He therefore distinguishes between a prospective translation science (translation difficulties, translator education) and a retrospective translation science (error analysis, translation criticism).⁴¹

In notes:

38. Radó, *Basic principles*, 305.

39. Bassnett-McGuire, *Translation Studies*, 134.

40. Pelc, "Several Questions to Experts", 14.

41. Little, "Norms of Collegiality", 330.

- **A note number may not be repeated** in the same document. If we cite the content of a document in different notes, references will be used in the notes following this first note.

Example

15. See note 3 above.

Complete references in notes

 In **papers without a bibliography** or with a selected bibliography, in which not all works cited appear, **full details must be given in a note** each time a work is cited **for the first time**. In subsequent citations to the same work, references may be given in abbreviated form.

We provide you with some guidelines for writing references in a note:

Basic structure of a note

Complete references in footnotes or endnotes normally include the following **elements**, in this order and **separated by commas**:

1. Names of **authors**, in direct order (i.e., First Name Last Name)
2. **Title**
3. **Publication data**, in parentheses
4. **Page(s)** of the cited paragraph.

Example

9. Kirsten Malmkjaer, *Key cultural texts in translation* (Amsterdam: John Benjamins, 2018), 66-67.

10. Esperanza López Parada, *El botón de seda negra: traducción religiosa y cultura material en las Indias* (Madrid: Editorial Iberoamericana, 2018), 95.

 In the notes, which usually refer to a passage in a document, only the page numbers where the quoted paragraph is found are cited.

Multiple authors

- In works with **two or three authors**, the last name of each author is given.
- In works with **more than three authors**, cite only the name of the first author followed by *et al.*

Example

11. Ulf Hermajakob *et al.*, “Incident-driven machine translation and name tagging for low-resource languages”, *Machine Translation* 32 (June 2018): 69.

Italics and quotation marks

- Titles of larger works (e.g., books and journals) are italicized.
- Titles of smaller works (e.g., chapters, articles) or unpublished works are presented in roman and enclosed in quotation marks.

Example

10. Franz Pöchhaker, “Media interpreting: From user expectations to audience comprehension”. In *Reception studies and audiovisual Translation*, ed. by Elena Di Giovanni, Yves Gambier (Amsterdam: John Benjamins, 2018), 261-262.

Abbreviations

Such terms as *editor/edited by*, *translator/translated by*, *volume*, and *edition* are abbreviated.

Example

11. Christiane Nord, *Traducir, una actividad con propósito: Introducción a los enfoques funcionalistas*, **trans.** George L. Bastin, Mayra S. Parra and Christiane Nord (Berlin: Frank & Timme, 2018), 107.

Shortened citations

 Although shortened citations are used to refer to sources cited at length in earlier footnotes, **in papers containing a complete bibliography**, the **abbreviated form** of citations may be used **even in the first citation**.

To reduce the volume of documentation in scholarly works that employ footnotes or endnotes, **source citations should be shortened** whenever possible.

Here are some guidelines for writing shortened citations:

Basic structure

Shortened citations should include enough information to remind readers of the full title or to lead them to the appropriate entry in the bibliography. Normally it is sufficient to indicate three elements:

1. The **author's** last name
2. The **abbreviated main title** (if it contains more than four words).
3. **Page(s)** of the cited paragraph.

Example

Shortened citation:

23. Orecchia, "Género y metaforización", 9.

In bibliography:

Orecchia Havas, Teresa. "Género y metaforización de la creación literaria en dos obras de Ricardo Piglia". *Orbis Tertius: Revista de teoría literaria* 16 (2010): 1-11.

 Note that the **full reference** gives the **complete page range** of the article or chapter, while the **short citation** only gives the **specific page** from which the information was obtained.

Short for authors' names

Only the last name of the author, or of the editor or translator if given first in the full reference, is needed in the short form. Full names or initials are included only when authors with the same last name must be distinguished from one another.

Example

25. Orecchia, "Género y metaforización", 9.
26. Gómez Mendoza, "Ecología urbana", 187.
27. Hernández Guerrero, "Presencia y utilización de traducción", 112-113.

Such **abbreviations** as *ed.* or *trans.* following a name in the full reference **are omitted** in shortened.

Example

Entry in the bibliography:

Penas Ibáñez, M^a Azucena, ed. *La traducción: Nuevos planteamientos teórico-metodológicos*. Madrid: Síntesis: 2015.

Shortened citation:

28. Penas, *La traducción*, 73.

If a work has **two or three authors**, give the last name of each.

Example

29. Mogorrón and Navarro, *Fraseología, didáctica y traducción*, 49-50.
30. Alonso, Páez and Samaniego, *Traducción y representaciones*, 111-112.

For **more than three authors**, give the last name of the first one followed by *et al.*

Example

31. Recio et al., *Interacciones*, 84.

Short form for titles of works

- Titles of four words or fewer are seldom shortened.

Example

12. Sanz Pinyol, “Escritura joven en la red”, 34.

- The short title **contains the key words** from the main title.

Example

Entry in the bibliography:

Orecchia Havas, Teresa. “Género y metaforización de la creación literaria en dos obras de Ricardo Piglia”. *Orbis Tertius: Revista de Teoría y Crítica literaria* 16 (2010): 1-11.

Shortened citation:

13. Orecchia, “Género y metaforización”, 9.

- **Initial articles** (*A/An, The*, and their equivalents in other languages) are usually omitted.

Example

Entry in the bibliography:

Kaiser, Ernst. “The literature of Harlem”. In *Harlem: A Community in Transition*, edited by J. H. Clarke, 87-94. New York: Citadel Press, 1964.

Shortened citation:

14. Kaiser, “Literature of Harlem”, 91.

- The short title is **italicized or set in roman and quotation marks** according to the way the full title appears.

Example

Entry in the bibliography:

García Izquierdo, Isabel. *El género textual y la traducción: Reflexiones teóricas y aplicaciones pedagógicas*. Berna: Peter Lang, 2005.

Shortened citation:

11. García Izquierdo, *Género textual y traducción*, 78.

Use of *Ibíd.*

We will use the abbreviation ***ibíd.*** in our notes to indicate that we are referring to a **work cited in the immediately preceding note.**

Example

15. Ramírez de la Peña, *Tendencias actuales*, 150.
16. *Ibíd.*, 235.

If the **entire reference**, including page numbers, is **identical**, only the abbreviation *Ibíd.* is used.

Example

15. Ramírez de la Peña, *Tendencias actuales*, 150.
16. *Ibíd.*

The abbreviation **should not be used** if the above note contains more than one citation.

Example

17. García Berrio, *Teoría de la literatura*, 216; Albadalejo, “Teoría de la literatura y Estética”, 9 and Chico Rico, “A vueltas con la Teoría de la Literatura”, 160-161.
18. Chico Rico, “A vueltas con la Teoría de la Literatura”, 166.

Citations plus commentary in a note

When a note contains not only the source of a fact or quotation in the text but related substantive material as well, **the source comes first.** A period usually separates the citation from the commentary.

Example

19. Shakespeare, *Julius Caesar*, act 3, sc. 1. Caesar’s claim of constancy should be taken with a grain of salt.

Several citations in a note

The number of note references in a sentence or a paragraph can sometimes be reduced by grouping several citations in a single note.

The citations are separated by semicolons and must appear in the same order as the text material (whether works, quotations, or whatever) to which they pertain. Take care to avoid any ambiguity as to what is documenting what.

Example

Text:

Only when we gather the work of several scholars—Walter Sutton’s explications of some of Whitman’s shorter poems; Paul Fussell’s careful study of structure in “Cradle”; S. K. Coffman’s close readings of “Crossing Brooklyn Ferry” and “Passage to India”; and the attempts of Thomas I. Rountree and John Lovell, dealing with “Song of Myself” and “Passage to India,” respectively, to elucidate the strategy in “indirection”—do we begin to get a sense of both the extent and the specificity of Whitman’s forms.¹⁹

Note:

19. Sutton, “Analysis of Free Versum Form”, 247; Fussell, “Whitman’s Curious Warble”, 40; Coffman, “Crossing Brooklyn Ferry”, 228; Coffman, “Forma and Meaning of Whitman’s”, 343; Rountree, “Whitman’s Indirect Expression”, 551 y Lovell, “Appreciating Whitman”, 136.

4.2. Author-date system

This is the second system of documentation of the Chicago style, which differs from the system of notes and bibliography mainly in two aspects:

- In the author-date system, **sources are cited in the text**, usually in parentheses, **by the author's last (family) name and the year of publication** (hence the name of the system), with no intervening punctuation. A page number may be added, following a comma, if needed.

Example

Because of its structure, the letter allows the sender to direct the communication, often using the metatextual function, the metacommunication (Calinescu 2003).

- A **reference list** —usually titled “References” or “Works Cited”— is normally placed **at the end of the work**, arranged alphabetically. In this list, each reference must correspond to a work cited in the text.

The elements of the references in this system will be treated in the same way as in the notes and bibliography system, with the exception that **the year of publication follows the author's name.**

Example

Text citation:

Because of its structure, the letter allows the sender to direct the communication, often using the metatextual function, the metacommunication (Calinescu 2003).

Reference list entry:

Calinescu, Matei. 2003. *Cinco caras de la modernidad: Modernismo, Vanguardia, Decadencia, Kitsch y Posmodernismo*. Madrid: Tecnos.

5. Writing bibliographic references according to document type

In this section we will first see some **general guidelines** for writing bibliographic references and then we will describe in detail and with some examples how to write bibliographic references for **different types of documents**.

5.1. General guidelines for writing references

In the following sections we will see the guidelines for stating the main elements of a reference:

- Punctuation
- Author
- Title
- Edition
- Publication data

 References written according to either of the **two Chicago style methods** (notes and bibliography method and author-year method) will have basically the **same structure** and the **same elements**, with the **exception of the year of publication**, which in the author-year system is placed after the author.

Example

Notes and bibliography system:

Notario Ruiz, Antonio, ed. *Contrapuntos estéticos*. Salamanca: Ediciones Universidad de Salamanca, 2005.

Author-date system:

Notario Ruiz, Antonio, ed. 2005. *Contrapuntos estéticos*. Salamanca: Ediciones Universidad de Salamanca.

5.1.1. Punctuation

In the references included in the **final bibliography** the elements are separated by **periods**.

In the references included **in notes** the elements are separated by **commas**, as we have seen in the section on notes.

5.1.2. Author

To facilitate alphabetical ordering in the bibliography, **the name of the author** (or the first author in the case of multiple authors) **is inverted** and takes the form Last Name, First Name.

Example

Notes and bibliography system:

Foulquié-Rubio, Ana Isabel, Mireia Vargas-Urpi and Magdalena Fernández Pérez, eds. *Panorama de la traducción y la interpretación en los servicios públicos españoles: una década de cambios, retos y oportunidades*. Granada: Comares: 2018.

Author-date system:

Foulquié-Rubio, Ana Isabel, Mireia Vargas-Urpi and Magdalena Fernández Pérez, eds. 2018. *Panorama de la traducción y la interpretación en los servicios públicos españoles: una década de cambios, retos y oportunidades*. Granada: Comares.

Multiple authors

When a work has **two or three authors or editors**:

- They should be placed in the reference in the order in which they appear on the title page.
- In the reference **only the name of the first author is inverted** and a comma is written before and after the first name or initials.
- The conjunction **and** is used (not the & sign).

Example

Notes and bibliography system:

Alonso Schökel, Luis, and Eduardo Zurro. *La traducción bíblica: lingüística y estilística*. Madrid: Cristiandad, 1977.

Author-date system:

Alonso Schökel, Luis, and Eduardo Zurro. 1977. *La traducción bíblica: lingüística y estilística*. Madrid: Cristiandad.

If a work has **more than three authors or editors**:

- They should all be cited, following the order and punctuation described for works with two or three authors.
- In the text, only the name of the first author should be given, followed by *et al.*

Example

Notes and bibliography system:

Martincano Gómez, José Luis, Ramón González Corrales, Javier García Campano, and Víctor Manuel González Rodríguez. *Los problemas de salud mental en el paciente inmigrante*. Madrid: IM&C, 2004.

Author-date system:

Martincano Gómez, José Luis, Ramón González Corrales, Javier García Campano, and Víctor Manuel González Rodríguez. 2004. *Los problemas de salud mental en el paciente inmigrante*. Madrid: IM&C.

For works with **more than ten authors**, it is recommended to cite only the first seven followed by *et al.* in the bibliography.

Full name vs initials

Authors' names are normally given as they appear with the source itself —that is, on the title page of a book or other stand-alone work or at the head of a journal article or the like. **First names may be given in full** in place of initials.

Example

Redondo Sánchez, Pablo

Some publications (especially those in the area of science) prefer to give the initials of the authors' names, not the complete form.

For authors who always use initials, full names should not be supplied. Note that space is added between initials. Exceptions may be made for special cases.

Example

Lewis, C. S.

But:

Sechzer, JA

A widely used **pseudonym** is generally treated as if it were the author's real name.

Example

Azorín. *La voluntad*. Madrid: Biblioteca Nueva, 1965.

If the **authorship** is known or guessed at but was **omitted on the title page**, the name is included in brackets.

Example

[Horsley, Samuel]. *On the prosodies of the Greek and Latin Languages*. London, 1796.

Unknown author

If the author or editor is unknown, the note or bibliography entry should normally begin with the title. An initial article is ignored in alphabetizing.

Example

Stanze in lode della donna brutta. Florence, 1547.

In general, for works of unknown authorship, Chicago recommends **avoiding the use of the term *Anonymous*** to replace the author's name.

When no author appears on the title page, a work is listed by the name(s) of the **editor(s), compiler(s), or translator(s)**. In full note citations and in bibliographies, the abbreviation *ed.* or *eds.*, *comp.* or *comps.*, or *trans.* follows the name, preceded by a comma. In shortened note citations and text citations, the abbreviation is omitted.

Example

Notes and bibliography system:

Andrés Suárez, Irene, ed. *Antología del microrrelato español (1906-211): El cuarto género narrativo*. Madrid: Cátedra, 2012.

Author-date system:

In-text citation: (Andrés Suárez 2012)

Reference:

Andrés Suárez, Irene, ed. 2012. *Antología del microrrelato español (1906-211): El cuarto género narrativo*. Madrid: Cátedra.

The terms **editor** and **translator** are abbreviated, but the verb forms used to indicate these functions, **edited by** and **translated by**, are not abbreviated.

Example

Notario Ruiz, Antonio, ed. *Contrapuntos estéticos*. Salamanca: Ediciones Universidad de Salamanca, 2005.

Fernández Ramírez, Salvador. 1985. *La enseñanza de la gramática y la literatura*. Edited by José Polo. Madrid: Arco Libros.

5.1.3. Title

Main titles (books and journals) appear in italics; **secondary titles** (chapters and articles) and unpublished works appear in round and in quotation marks.

Example

Ballester, Xaverio. "El verso perdido de Ovidio". *Anuari de Filologia: Antiqua et Medievalia* 3 (2013): 25-29.

The **spelling and punctuation** in the original title should be preserved, with the following exceptions: words in full capitals on the original title page (except for initialisms or acronyms) should be set in upper- and lowercase; headline-style capitalization should be applied; an ampersand (&) may be changed to and. Numbers should remain spelled out or given as numerals according to the original.

A colon is used to separate the main title from the **subtitle** (even if no colon appears in the source itself). A space follows the colon. The subtitle, like the title, always begins with a capital letter.

Example

Weiss, Andrea. *In the Shadow of the Magic Mountain: The Erika and Klaus Mann Story*. Chicago: University of Chicago Press, 2008.

5.1.4. Edition

When an **edition other than the first** is used or cited, the number or description of the edition follows the title in the listing. Such wording as **Second Edition** is abbreviated in notes and bibliographies simply as **2nd ed.** *Revised and Enlarged Edition* (with no number) is abbreviated as **Rev. ed.** Other terms are similarly abbreviated.

Example

Strunk, William and E. B. White. *The Elements of Style*. 4th ed. New York: Allyn and Bacon, 2000.

5.1.5. Publication data

In the references, the publication data appear after the title and, if applicable, the edition.

Example

Foulquié-Rubio, Ana Isabel, Mireia Vargas-Urpi and Magdalena Fernández Pérez, eds. *Panorama de la traducción y la interpretación en los servicios públicos españoles: Una década de cambios, retos y oportunidades*. **Granada: Comares, 2018.**

Place of publication

A colon appears between place and publisher.

Example

Smith, Zadie. *On beauty*. **New York:** Penguin Press, 2005.

Where **two or more cities** are given, only the first is normally included in the citation.

Example

On the title page of the document:

The University of Chicago Press

Chicago and London

In the reference:

Chicago: The University of Chicago Press

In the case of **foreign cities** we will write the name in the language in which we write our work, if it exists.

Example

If we write our work in English:

Vienna (*not* Wien)

Milan (*not* Milano)

Prague (*not* Praha)

When the place of publication is **not known**, the abbreviation **n.p.** (or *N.p.* if following a period) may be used before the publisher's name.

Example

Martín, E. *Bibliotecas*. N.p.: SAPYL, 1948.

If the place can be surmised, it may be given with a question mark, in brackets.

Example

González del Castillo, Juan Ignacio. *El café de Cádiz y otros sainetes*. [Madrid?]: EMESA, 1977.

Publisher

The publisher's name may be given either in full (e.g., as printed on the title page of the book) or in a somewhat abbreviated form. **The shorter forms are preferred** in most bibliographies. Words as *Inc.*, *Ltd.*, *Co.*, & *Co.*, *Publishing Co.*, and the like following a name are also usually omitted from a publisher's name.

Example

Houghton Mifflin *not* Houghton Mifflin Co.

Macmillan *not* Macmillan Publishing Co.

When the publisher's name is **not known**, it can usually be omitted.

Example

Martí i Adell, Cristòfol. *Babel, Babel*. Xàtiva, 1988.

Publication date

In the **notes and bibliography system**, the date follows the publisher after a comma. In the **author-year system**, the date preceded by a period follows the author and is also separated from the title by a period.

Example

Notes and bibliography system:

Smith, Zadie. *On beauty*. New York: Penguin, 2005.

Author-date system:

Smith, Zadie. 2005. *On beauty*. New York: Penguin.

When the publication date of a printed work **cannot be ascertained**, the abbreviation **n.d.** takes the place of the year in the publication details.

Example

Notes and bibliography system:

Chamberlain, John. *El atraso de España*. Valencia: F. Sempere, n.d.

Author-date system:

Chamberlain, John. n.d. *El atraso de España*. Valencia: F. Sempere.

A **guessed-at date** may either be substituted (in brackets) or added.

Example

Notes and bibliography system:

Hutter, Heribert. *Vitraux del Medioevo*. Barcelona: Edhasa, ca. 1960.

Author-date system:

Hutter, Heribert. [1960]. *Vitraux del Medioevo*. Barcelona: Edhasa.

 A work for which no publisher, place, or date can be determined or reasonably guessed at should be included in a bibliography only if accompanied by the location where a copy can be found (e.g., “Two copies in the Special Collections Department of the University of Chicago Library”).

5.2. Print sources

In this block we will describe the wording of the references of four types of printed documents:

- Books
- Book chapters
- Journal articles
- Unpublished materials

5.2.1. Books

The following templates show what elements should be included in what order when citing books in bibliographies and reference lists:

Notes and bibliography system:

Author/s. *Title of Book: Subtitle of Book*. Edition. City of Publication: Publisher's Name, Year of Publication.

Author-date system:

Author/s. Year of Publication. *Title of Book: Subtitle of Book*. Edition. City of Publication: Publisher's Name.

It will only be necessary to indicate the edition if it is not the first one.

Example

Author/s.	Bastin, Georges L. and Paul F. Bandia, eds.
Year. (Author-date system)	2006.
Title of Book.	<i>Charting the Future of Translation History.</i>
Edition.	1st edition (Not necessary to indicate it)
City of Publication:	Ottawa:
Publisher's Name,	University of Ottawa Press,
Year. (Notes and bibliography)	2006.

This is how the reference would be worded:

Notes and bibliography system:

Bastin, Georges L. and Paul F. Bandia, eds. *Charting the Future of Translation History*. Ottawa: University of Ottawa Press, 2006.

Author-date system:

Bastin, Georges L. and Paul F. Bandia, eds. 2006. *Charting the Future of Translation History*. Ottawa: University of Ottawa Press.

5.2.2. Book chapters

The following templates show what elements should be included in what order when citing book chapters in bibliographies and reference lists:

Notes and bibliography system:

Chapter Author/s. "Title of Chapter: Subtitle of Chapter." In *Title of Book: Subtitle of Book*, edited by Editor/s, Range of page numbers of the chapter. Edition. Place of publication: Publisher's Name, Year of Publication.

Author-date system:

Chapter Author/s. Year of Publication. "Title of Chapter: Subtitle of Chapter." In *Title of Book: Subtitle of Book*, edited by Editor/s, Range of page numbers of the chapter. Edition. Place of publication: Publisher's Name.

Example

Contents	
Introduction	vii
I Predictors for modelling	
1 Predicting cognate translation Silvia Hansen-Schirra, Jean Nitzke & Katharina Oster	3
2 The influence of self-monitoring on the translation of cognates Katharina Oster	23
3 Modelling the analysis of translation memory use and post-editing of raw machine translation output: A pilot study of trainee translators' perceptions of difficulty and time effectiveness Alessandra Rossetti & Federico Gaspari	41
II Focus on the process	
4 Sketch of a Noisy Channel Model for the translation process Michael Carl & Moritz Schaeffer	71
5 Language processing and translation Moritz Schaeffer & Michael Carl	117
6 Cognitive effort and explicitation in translation tasks Igor A. Lourenço da Silva & Adriana Silvina Pagano	155
7 Changes of word class during translation – Insights from a combined analysis of corpus, keystroke logging and eye-tracking data Tatiana Serbina, Sven Hintzen, Paula Niemietz & Stella Neumann	177

Chapter Author/s.	Schaeffer, Moritz and Michael Carl.
Year. (Author-date system)	2017.
“Title of Chapter”.	“Language processing and translation”.
In	In
Title of Book,	<i>Empirical modelling of translation and interpreting,</i>
edited by	edited by
Editor/s,	Silvia Hansen-Schirra, Oliver Czulo and Sascha Hofman,
Range of page numbers of the chapter.	117-154.
Edition.	1st ed. (Not necessary to indicate it)
City of Publication:	Berlin:
Publisher’s Name,	Language Science Press,
Year. (Notes and bibliography)	2017.

This is how the reference would be worded:

Notes and bibliography system:

Schaeffer, Moritz and Michael Carl. "Language processing and translation". In *Empirical modelling of Translation and interpreting*, edited by Silvia Hansen-Schirra, Oliver Czulo and Sascha Hofman, 117-154. Berlin: Language Science Press, 2017.

Author-date system:

Schaeffer, Moritz and Michael Carl. 2017. "Language processing and translation". In *Empirical modelling of Translation and interpreting*, edited by Silvia Hansen-Schirra, Oliver Czulo and Sascha Hofman, 117-154. Berlin: Language Science Press.

5.2.3. Journal articles

Before looking at the scheme used to write the bibliographic references of journal articles, let's look at some **peculiarities** of this type of references.

Titles

- **Titles of articles** are set in roman (except for individual words or phrases that require italics, such as species names or book titles); they are usually capitalized headline-style and put in quotation marks. As with a book, title and subtitle are separated by a colon.
- **Titles of journals** are italicized and capitalized headline-style.

Example

Notes and bibliography system:

Soriano Barabino, Guadalupe. "La formación del traductor jurídico: análisis de la competencia traductora en traducción jurídica y propuesta de programa formativo". *Quaderns: Revista de Traducció*, no. 25 (2018), 217-229.

Author-date system:

Soriano Barabino, Guadalupe. 2018. "La formación del traductor jurídico: análisis de la competencia traductora en traducción jurídica y propuesta de programa formativo". *Quaderns: Revista de Traducció*, no. 25: 217-229.

Journal volume, issue, and date

Most journal citations include **volume**, **issue** number or month, and **year**.

Notes and bibliography system:

- The **volume number**, set in roman, follows the journal title without intervening punctuation. The term ‘volume’ is omitted. Arabic numerals are used even if the journal itself uses roman numerals.
- The **issue number** follows the volume number, separated by a comma and preceded by *no*.
- The year, sometimes preceded by an exact **date**, a month, or a season, appears in parentheses after the volume and issue data. Months may be abbreviated or spelled in full; seasons are best spelled out. Where a span of months or seasons is given, follow the usage of the journal.

Example

León Mejía, Ana. “¿Disidencia dentro del feminismo?”. *Revista Internacional de Sociología* 67, no. 3 (sept./dic. 2009): 559-588.

- When a journal uses issue numbers only, without volume numbers, a comma follows the journal title.

Example

Ruiz Casanova, José Francisco. “Plagio y traducción o la traducción como plagio”. *1611: Revista de Historia de la Traducción*, no. 11 (2017), 153-162.

Author-date system:

- The **year of publication** follows the name of the author(s), preceded and followed by a period and without parentheses.
- The **volume number**, set in roman, follows the journal title without intervening punctuation. The term 'volume' is omitted. Arabic numerals are used even if the journal itself uses roman numerals.
- The **issue number** follows the volume number in parentheses.
- The **page range** follows the issue number, separated by a colon and with no intervening space.

Example

Ruiz Casanova, José Francisco. 2017. "Plagio y traducción o la traducción como plagio". *1611: Revista de Historia de la Traducción*, no. 11: 153-162.

- When only an issue number is used, it is set off by commas and not enclosed in parentheses.

The following templates show what elements should be included in what order when citing journal articles in print in bibliographies and reference lists:

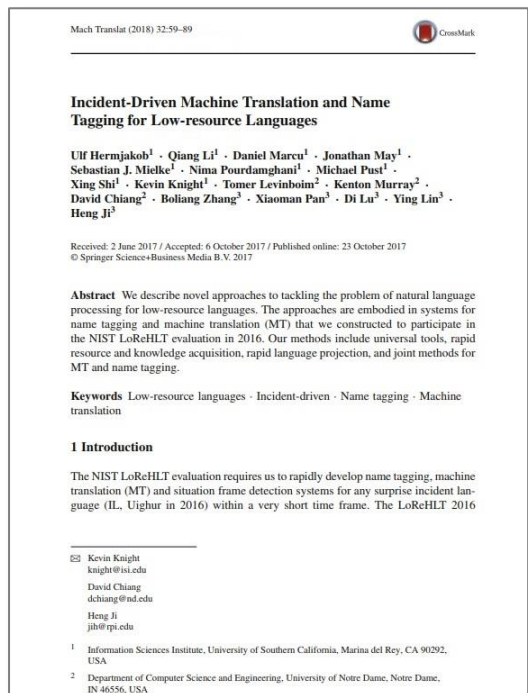

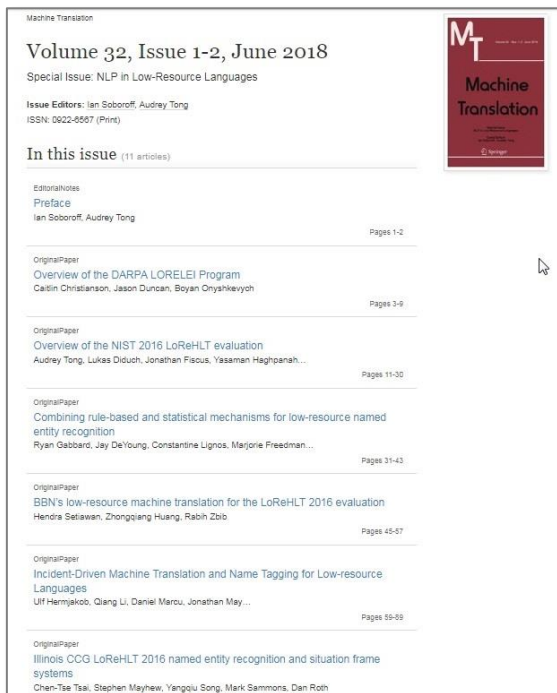

Notes and bibliography system:

Author/s. "Title of Article: Subtitle of Article". *Title of Journal* Volume Number, Issue Number (Date of Publication): First page-Last page of the article.

Author-date system:

Author/s. Year of Publication. "Title of Article: Subtitle of Article". *Title of Journal* Volume Number (Issue number): First page-Last page of the article.

Example

Author/s.	Hermjakob, Ulf et al.
Year. (Author-date system)	2018.
“Title of Article”.	“Incident-Driven Machine Translation and Name Tagging for Low-resource Languages”.
Title of Journal	<i>Machine Translation</i>
Volume number, issue number (date): (Notes and bibliography system)	32, no. 1-2 (June 2018):
Volume number (issue number): (Author-date system)	32 (1-2):
First page-Last page of the article.	59-89.

This is how the reference would be worded:

Notes and bibliography system:

Hermajakob, Ulf et al. "Incident-Driven Machine Translation and Name Tagging for Low-resource Languages". *Machine Translation* 32, no. 1-2 (June 2018): 59-89.

Author-date system:

Hermajakob, Ulf et al. 2018. "Incident-Driven Machine Translation and Name Tagging for Low-resource Languages". *Machine Translation* 32 (1-2): 59-89.

5.2.4. Unpublished materials

In this section we will see how to write the references of:

- Theses, dissertations and similar works.
- Classes, papers, lectures, conferences and communications in congresses.
- Patents

Theses, dissertations and similar works

The bibliographic references of **theses, dissertations, final degree projects (TFG), master's degree projects (TFM), final projects (PFC)** and other similar academic works are elaborated according to the following general scheme:

Notes and bibliography system:

Author. "Title of the work". Type of academic work. Academic institution, year.

Author-date system:

Author. Year. "Title of the work". Type of academic work. Academic institution.

Example

```
> Título: EL COMERCIO DE LA CERÁMICA EN LA MALACA ANTIGUA: LOS HALLAZGOS DEL TEATRO ROMANO
> Autor: TORRES BLANCO, MARIA ISABEL
> Universidad: Universidad de Málaga
> Departamento: Arqueología e historia medieval
> Fecha de Lectura: 30/09/2003
> Programa de doctorado: METODOLOGÍA PARA EL ESTUDIO DE LA ANTIGÜEDAD Y LA EDAD MEDIA
> Dirección:
  > SERRANO RAMOS, ENCARNACIÓN (Director)
  > ATENCIA PÁEZ, RAFAEL (Codirector)
> Tribunal:
  > RODRIGUEZ OLIVA, PEDRO (presidente)
  > BAENA DEL ALCÁZAR, LUIS (secretario)
  > ROMERO CARNICERO MARÍA VICTORIA (vocal)
  > SOTOMAYOR MURO, MANUEL (vocal)
  > FERNÁNDEZ GARCÍA MARÍA ISABEL (vocal)
```

Author.	Torres Blanco, M. Isabel.
Year. (Author-date system)	2003.
“Title of the work”.	“El comercio de la cerámica en la Malaca antigua: Los hallazgos del teatro romano”.
Type of academic work.	Thesis.
Academic Institution	Universidad de Málaga
Year. (Notes and bibliography)	2003.

This is how the reference would be worded:

Notes and bibliography system:

Torres Blanco, M. Isabel. “El comercio de la cerámica en la Malaca antigua: Los hallazgos del teatro romano”. Thesis. Universidad de Málaga, 2003.

Author-date system:

Torres Blanco, M. Isabel. 2003. “El comercio de la cerámica en la Malaca antigua: Los hallazgos del teatro romano”. Thesis. Universidad de Málaga.

Classes, lectures, conferences and communications in congresses

Bibliographic references of classes, lectures and communications in congresses are elaborated according to the following general scheme:

Notes and bibliography system:

Author/s. "Title". Class/Presentation/Lecture/Conference/ Communication presented at Seminar/Congress/Meeting/Assembly. Sponsoring Organization/Institution, place, date.

Author-date system:

Author/s. Date. "Title". Class/Presentation/Conference/ Communication presented at Seminar/Congress/Meeting/Assembly. Sponsoring Organization/Institution, place.

Example

The screenshot shows the website for the American Society for Mass Spectrometry (ASMS). The page features a navigation menu with links to Publications, Conferences, Member Center, Career Center, About ASMS, About Mass Spec, and Awards. Below the menu is a list of conferences, with the 51st ASMS Conference (June 8 - 12, 2003, Montreal, Canada) highlighted by a red rectangular box.

ASMS Logo	American Society for Mass Spectrometry	AS

<p>⑤ Título: Instalación para el aprendizaje del apeo de árboles.</p>		

Creator/s.	Gómez Moya, Luís and Juan Ramón Torres Sánchez.
Year of concession. (Author-date system)	2008.
Title.	Instalación para el aprendizaje del apeo de árboles.
Patent.	Patent.
Organization granting the patent,	Oficina Española de Patentes y Marcas,
date of application,	date of application 21/09/2005,
date of grant.	date of grant 22/04/2008.

This is how the reference would be worded:

Notes and bibliography system:

Gómez Moya, Luís and Juan Ramón Torres Sánchez. Instalación para el aprendizaje del apeo de árboles. Patent. Oficina Española de Patentes y Marcas, date of application 21/09/2005, date of grant 22/04/2008.

Author-date system:

Gómez Moya, Luís and Juan Ramón Torres Sánchez. 2008. Instalación para el aprendizaje del apeo de árboles. Patent. Oficina Española de Patentes y Marcas, date of application 21/09/2005, date of grant 22/04/2008.

5.3. Web pages and other Internet materials

Previous questions

- References of documents accessible through the Internet generally follow the same schemes as for printed documents.
- When citing electronic sources accessible online, the Chicago style recommends the **inclusion of a URL** (*Uniform Resource Locator*) or **DOI** (*Digital Object Identifier*) as the final element of the reference.
- Chicago **does not require the date of access** in citations to electronic sources, unless the date of publication or revision cannot be determined based on the source. However, some publishers in certain disciplines (especially Science and Medicine) require access dates. It should also be noted that students are usually required to give dates of access to the sources they cite in their papers.

To avoid interference in the link, it is recommended **not to end the web address with a dot.**

In the following we will describe the writing of references for six types of documents on the Internet:

- Electronic books
- Chapters of e-books
- Electronic journal articles
- Websites
- Blogs
- Online multimedia

5.3.1. Electronic books

The bibliographic references of electronic books on the Internet are elaborated according to the following scheme:

Notes and bibliography system:

Author/s. *Title of Book*. Edition. City of Publication: Publisher's Name, Year. DOI or URL

Author-date system:

Author/s. Year. *Title of Book*. Edition. City of Publication: Publisher's Name. DOI o URL

Example

The screenshot shows the Springer website for the book "Language Grounding in Robots". The page includes the book cover, editor information (Luc Steels and Manfred Hild), and bibliographic details. The editors are listed as Luc Steels (1) and Manfred Hild (2). The bibliographic information includes the DOI (https://doi.org/10.1007/978-1-4614-3064-3), the copyright information (Springer Science+Business Media, LLC 2012), and the publisher name (Springer, Boston, MA). The print ISBN is 978-1-4614-3063-6 and the online ISBN is 978-1-4614-3064-3.

The screenshot shows the backmatter page of the book "Language Grounding in Robots". It includes the editors' names and affiliations: Luc Steels (ICREA - Institute for Evolutionary Biology (UPF-CSIC) Barcelona, Spain; Sony Computer Science Laboratory Paris, France) and Manfred Hild (NRL - Neurobotics Research Laboratory Humboldt-Universität zu Berlin, Germany; Sony Computer Science Laboratory Paris, France). The page also contains the ISBNs (978-1-4614-3063-6 and 978-1-4614-3064-3), the DOI (10.1007/978-1-4614-3064-3), the publisher information (Springer New York, Dordrecht, Heidelberg, London), and the Library of Congress Control Number (2012930833). A copyright notice for Springer Science+Business Media, LLC 2012 is also present.

Author/s.	Steels, Luc and Manfred Hild, eds.
Year. (Author-date system)	2012.
Title of Book.	<i>Language Grounding in Robots.</i>
Edition.	1st ed. (Not necessary to indicate it)
City of Publication:	Boston:
Publisher's Name,	Springer,
Year. (Notes and bibliography)	2012.
DOI or URL	DOI 10.1007/978-1-4614-3064-3.

This is how the reference would be worded:

Notes and bibliography system:

Steels, Luc and Manfred Hild, eds. *Language Grounding in Robots.*
Boston: Springer, 2012. DOI 10.1007/978-1-4614-3064-3.

Author-date system:

Laura Gasca Jiménez*

Departamento de Estudios Hispánicos, Universidad de Houston, Houston, Estados Unidos

The relationship between language teaching and translation is not an easy one; however, in the last decades, translation has gained growing popularity as a pedagogical tool in language teaching. Following the same line of inquiry, this study constitutes a first step towards the integration of the translation activity in heritage language teaching as it focuses on revealing the habits, attitudes, and background knowledge of Spanish heritage language learners in the United States. The study was carried out with fifty-nine undergraduate students of Spanish as a heritage language enrolled in a high-intermediate class at the University of Houston. The participants completed a linguistic background survey, a survey about their translation habits and attitudes, and a translation task from English into Spanish. The results indicate that most Spanish heritage learners translate frequently from English into Spanish. The most popular translation contexts are the familiar and personal, the academic, and the professional. Their attitudes towards translation are very positive and most highlighted its instrumental value in the context of the United States. In addition, the translation analysis shows that most participants are able to transfer most original messages of a source text through the use of different translation techniques with varying precision levels.

Keywords: translation; language teaching; Spanish as a heritage language; pedagogical translation

La relació entre la ensenyança de llengües i la traducció és conflictiva; no obstant, en les últimes dècades, la traducció ha guanyat una creixent popularitat com a eina pedagògica. Enmarcada dins de la mateixa línia de investigació, el present estudi constitueix un primer pas cap a la integració de la activitat traductora en la ensenyança de llengües de herència, ja que se centra en sacar a la llum els hàbits, les actituds i els coneixements previs amb els que els estudiants de herència de castellà lluegen a les aules en els Estats Units. El estudi se feu amb cinquanta-nou estudiants universitaris d'espanyol com a llengua de herència matriculats en una classe de nivell intermediari alt a la Universitat de Houston. Els participants van completar un qüestionari sobre els antecedents lingüístics, un qüestionari sobre els hàbits traductors i actituds i un exercici de traducció de castellà a anglès. Els resultats indiquen que la majoria de les estudiants de herència tradueix a menudo en la comunicació familiar-espanyol. Els contextos principals de traducció són el familiar i personal, el acadèmic i el professional. Els actituds amb la traducció són molt positives i la majoria destaca el valor instrumental en el context dels Estats Units. A més, el anàlisi de les traduccions indica que la majoria és capaç de transferir la majoria de les missatges de un text de origen mitjançant el ús de tècniques variades de traducció amb diferents nivells de precisió.

Palabras clave: traducción; enseñanza de lenguas; español como lengua de herencia; traducción pedagógica

5.3.3. Electronic journal articles

The bibliographic references of electronic journal articles on the Internet are prepared according to the following scheme:

Notes and bibliography system:

Author/s. "Title of article". *Title of the journal* volume number, issue number (date of publication): initial page - final page of the article. DOI or URL

Author-date system:

Author/s. Date of publication. "Title of the article". *Title of the journal* volume number (issue number): initial page - final page of the article. DOI or URL

 In citations in footnotes and references of electronic journal articles, **the DOI should preferably be included** if the article has one. If a URL is used, we will give the address of the article (or of the summary or abstract), unless a more stable form (URI) accompanies the article.

Example

The screenshot shows a journal article page from 'Translation Studies'. The article title is 'The poetics of displacement: Self-translation among contemporary Russian-American poets' by Adrian Wanner. It includes a DOI link, a 'Full Article' button, and an abstract. The abstract text reads: 'This article explores the practice of self-translation by two bilingual Russian-American poets, Andrey Gritsman and Katia Kapovich. A close reading of some of their self-translated texts elucidates the idiosyncratic nature of self-translation and its poetics of displacement. For both Gritsman and Kapovich, ...'

The poetics of displacement: Self-translation among contemporary Russian-American poets

Adrian Wanner

Department of Germanic and Slavic Languages and Literatures, Pennsylvania State University, University Park, PA, USA

ABSTRACT

This article explores the practice of self-translation by two bilingual Russian-American poets, Andrey Gritsman and Katia Kapovich. A close reading of some of their self-translated texts elucidates the idiosyncratic nature of self-translation and its poetics of displacement. For both Gritsman and Kapovich, translating their own work becomes a means of exploring the mutation of the self through time, migration, and changing linguistic and cultural environments. A significant difference between the two authors concerns the way in which they present their poems. Gritsman invites a comparison between source and target text and the gaps between them in a bilingual en face edition, whereas Kapovich camouflages her self-translated poems as English originals. In spite of the different staging and performance of self-translation, both poets – by stressing difference rather than similarity in translation – turn their self-translated texts into a metacommentary on their own shifting transnational identities.

KEYWORDS

Self-translation; translation of poetry; Russian-American poetry; translanguaging; Andrey Gritsman; Katia Kapovich

Self-translation has only relatively recently developed into a serious topic of inquiry in the context of translation studies.¹ One difficulty in coming to terms with this phenomenon is the challenge it presents to received notions of translation theory and textual authority. As Jan Hokenson and Marcella Munson have pointed out, self-translation “escapes the binary categories of text theory and diverges radically from literary norms: here the translator *is* the author, the translation is an original, the foreign is the domestic, and vice versa” (2007, 161, original emphasis). In collapsing the roles of author and translator, self-translations tend to acquire in the eyes of the reading public a more authoritative status, given that the writer-translator, compared to an extraneous translator, is supposed to be closer to the original text. At the same time, somewhat paradoxically, it is assumed that the author-translator, as the intellectual owner of the text, “can allow himself bold shifts from the source text which, had it been done by another translator, probably would not have passed as an adequate translation” (Perry 1981, 181).

The term “self-translation” is in itself ambiguous, depending on whether we see the “self” as the subject or the object of the translational process. If seen as the subject, the self is the agent of textual production. If the self is perceived as the object, however, self-translation literally involves a “translation of the self”. Seen from that angle, any

5.3.4. Websites

 Citations of website content can often be **limited to the notes**; in works with no notes, they may be included in the bibliography (cited by the owner or sponsor of the site).

Particularities of website references

Websites should be cited by a **specific name** (if available), by the name of the sponsor or author, or by a descriptive phrase.

Example

Leon Hunter
20.000 lenguas

Some sites are referred to by their **domain name** (the first part of the URL following the double slash and preceding .com, .es, .edu, .org, etc.). These names, which are not case-sensitive, are often abbreviated and capitalized according to normal usage.

Example

www.google.com → Google
www.nytimes.com → New York Times

Spelling: Titles of websites are generally set in roman without quotation marks and capitalized headline-style. Titled sections or pages of a website are usually placed in quotation marks.

Example

Name of the website:

EUATC: European Unions of Associations of Translation Companies

Title of the section or part of the website:

“Machine Translation: Is it ready for me?”

The following templates show what elements should be included in what order when citing websites:

Notes and bibliography system (in note):

Author/s of the content, Title or description of the page, Ownership or sponsorship of the website, Date of publication/revision/modification or date of consultation (if none of the above dates can be determined or if this date is required), URL

Author-date system (in note if the work contains notes):

Author/s of the content, Date of publication/revision/modification, Title or description of the page, Ownership or sponsorship of the website, date of consultation (if none of the above dates can be determined or if this date is required), URL

Author-date system (in the reference list):

Author/s of the content, Date of publication/revision/modification. Title or description of the page. Ownership or sponsorship of the site. Date of consultation (if none of the above dates can be determined or if this date is required). URL

Example

The screenshot shows the website for the Linguistic Society of America (LSA). The header includes navigation links: Home, Contact, Member Login, Join Now/Renew/Member Benefits, My Cart, Donate, About LSA, Jobs Center, and News Room. The LSA logo is prominently displayed with the tagline 'Advancing the Scientific Study of Language'. Below the logo is a search bar and social media icons for Facebook, Twitter, and YouTube. A secondary navigation bar contains links for Meetings & Institutes, What is Linguistics?, LSA Publications, LSA Members Section, Issues in Linguistics, and Resource Hub. A third navigation bar lists 'Linguistics in Everyday Life', 'Studying Linguistics', 'The Science of Linguistics', and 'Linguistics as a Profession'. The main content area features an article titled 'Why Major in Linguistics?' by Monica Macaulay and Kristen Syrett. The article text discusses the field of linguistics and provides a list of topics it covers, such as the unconscious knowledge of language and how children acquire it. To the right of the article are 'Print Page', 'Email This', and 'Tweet This' buttons. A sidebar on the right contains a list of related articles: 'Linguistics in Everyday Life', 'Studying Linguistics', 'Why Major in Linguistics?', 'The Science of Linguistics', and 'Linguistics as a Profession'.

Author/s of the content.	Monica Macaulay and Kristen Syrett (in note) Macaulay, Monica and Kristen Syrett (in the reference list)
Date of publication (Author-date system)	2012
Title of the web page	“Why major in Linguistics?”
Ownership or sponsorship of the website	Linguistic Society of America
Date of publication (Notes and bibliography system)	2012
Date of consultation (optional)	accessed January 15, 2024
URL	https://www.linguisticsociety.org/content/why-major-linguistics

This is how the reference would be worded:

Notes and bibliography system (in note):

45. Monica Macaulay and Kristen Syrett, “Why Major in Linguistics?”, Linguistic Society of America, 2012, accessed January 15, 2024, <https://www.linguisticsociety.org/content/why-major-linguistics>

Author-date system (in note if the work contains notes):

45. Monica Macaulay and Kristen Syrett, 2012, “Why Major in Linguistics?”, Linguistic Society of America, accessed January 15, 2024, <https://www.linguisticsociety.org/content/why-major-linguistics>

Author-date system (in reference list if the work does not have notes):

Macaulay, Monica and Kristen Syrett. 2012. “Why Major in Linguistics?”. Linguistic Society of America. Accessed January 15, 2024. <https://www.linguisticsociety.org/content/why-major-linguistics>

 Note that in the examples we have provided you with the **date of access**, which, as we said in a previous section, is usually required of students in the documentation of their work.

5.3.5. Blogs

 **Blog posts are cited like online newspaper articles.** The titles of blogs can usually be set in italics; titles of blog posts (analogous to articles in a periodical) are placed in quotation marks. The word *blog* may be added (in parentheses) after the title of the blog (unless the word *blog* is part of the title).

Citations of blog posts, like those of newspaper articles, **can often be relegated to the text or notes**; if a bibliography entry is needed, it should be listed under the author of the post.

Blog entries

The following templates show what elements should be included in what order when citing blog entries:

Notes and bibliography system:

In note:

Author of the post, "Title of the post", *Title of the blog* (blog), date of publication/modification of the post, URL.

Author-date system:

In note (if the work contains notes):

Author of the post, date of publication/modification of the post, "Title of the post", *Title of the blog* (blog), URL.

In the list of references (if the work does not contain notes):

Author of the post. Date of publication/modification of the post. "Title of the post". *Title of the blog* (blog). URL

Traducir para niños no es cosa de magia

POSTED BY ENLALUNADEABEL IN TRADUCCIÓN, TRADUCCIÓN LITERARIA

≈ 10 COMENTARIOS

Etiquetas

álbum ilustrado, libro de magia, traducció al català, traducción infantil, traducir para niños, traduir al català

¿De qué hablamos cuando hablamos de traducir LIJ? Pues de **devanarnos los sesos en casi cada página**, porque traducir para niños y jóvenes no es tan fácil. Hace poco ha salido a la venta este álbum que he tenido el placer de traducir al catalán para [La Galera](#). Un libro que narra la historia de Elliot, un niño que quiere ser mago.

Además del tono y el registro que debemos cuidar para traducir, en este género abundan los chascarrillos y los juegos de palabras. Sin ir más lejos, los encontramos en los nombres de los magos: Quico Nill o Carles Capista (escondemos el «conill», conejo, o el «escapista» en el nombre), Bernat

Comments to blog entries

Comments can usually be cited in the text, in reference to the related post. If the comment is cited in a note, list the name of the commenter and the date of the comment, followed by the information for the related post. A URL for the comment is usually unnecessary but may be listed if available. For obviously fictitious names, there is usually no need to add *pseud.* (if known, the identity can be given in the text or in the citation, following the screen name in square brackets). A name in all lowercase can usually be capitalized.

The following templates show what elements should be included in what order when citing comments to blog entries:

Notes and bibliography system:

In note:

Author of comment, date (and time) of comment, comment to Author of post, "Title of post", *Title of blog* (blog), date of post, date of post, URL

Author-date system:

In note (if the work contains notes):

Author of comment, date (and time) of comment, comment to Author of post, "Title of post", *Title of blog* (blog), date of post, URL.

In the list of references (if the work does not contain notes):

Author of the comment. Date (and time) of the comment. Comment to Author of the entry. "Title of the entry". *Title of the blog* (blog). Date of the entry. URL

 29.10.2018 POR PABLO MUÑOZ SÁNCHEZ & COMENTARIOS

5 buenos hábitos al traducir aplicaciones móviles

SOBRE EL AUTOR
PABLO MUÑOZ SÁNCHEZ
 Inglés | Español | Nuevo Traductor

Soy traductor inglés > español con más de 10 años de experiencia especializado en localización de videojuegos y software. He traducido juegos como *Moband* y *Hero Emblem* y ahora trabajo, entre otras cosas, como revisor en las oficinas de Google Madrid a través de *Vistatec*. También soy cofundador de *Tradovernia*, una plataforma de cursos online para traductores. Más sobre mí | Mis cursos online | Mi libro de localización | Mi web

El otro día, mientras revisaba un proyecto, me encontré con el sitio web de Material Design, un conjunto de normas de diseño ideado por Google para crear aplicaciones de

Fernando Gabriel Gregoire dice:
 29-10-2018 al 22:34 pm

¡Qué bueno que hayas vuelto a escribir, Pablo! Sí, las normas Material Design están muy bien, incluidas las partes relativas a la redacción y buenas prácticas de localización. Es una lástima que Google si las tiene no publique, como hacen por ejemplo Microsoft y Facebook, guías de estilo específicas para cada idioma, y ni hablar de cuánto es de lamentar que de productos de Google no exista —para ser consistentes con el SO en nuestras traducciones— una base de datos terminológica como la del portal lingüístico de Microsoft.

Respecto del lenguaje inclusivo, para las frases superhabituales cual la del segundo ejemplo es mucho más factible en aplicaciones móviles, dada su informalidad. En aplicaciones para PC enfocadas a la productividad que son más formales ello es más difícil, porque prescindir del verbo (¿Seguro que...?) tiene cierto aire coloquial.

Respecto de enunciar primero el objetivo y después la manera de lograrlo, en general es la mejor aproximación. Hay una excepción notoria bastante común, que es la de mensajes de ayuda emitidos por lectores de pantalla, donde —para el caso de dispositivos sin teclado físico— a menudo el usuario no necesita ayuda sobre qué hace determinado control porque ésta le dan la etiqueta o el propio contexto de la interfaz, sino sobre cuál es el equivalente de determinado gesto estándar cuando un programa de accesibilidad tiene «secuestrada» la pantalla. En otras palabras, si en la app se respeta el punto 4 de esta entrada, cada control y

Gregoire, Fernando Gabriel. October 29, 2018 (22:34). Comment to Pablo Muñoz Sánchez. “5 buenos hábitos al traducir aplicaciones móviles”. *Algo más que traducir* (blog). October 29, 2018. <https://algotrasladucir.com/5-buenos-habitos-traduccion-aplicaciones-moviles/#comments>

If it is necessary to cite an entire blog, list it in a bibliography under the name of the editor (if any) or the title of the blog:

Author. Title of the blog (blog). URL

This is how the references of the example blogs would be written in the bibliography (notes and bibliography system) or in the list of references (author-date system):

Example

Muñoz Sánchez, Pablo. *Algo más que traducir* (blog). <https://algotrasladucir.com/>

Surià López, Scheherezade. *En la luna de Babel* (blog). <https://enlalunadebabel.com/>

5.3.6. Online multimedia

The bibliographic references of online multimedia materials are elaborated according to the following scheme:

Notes and bibliography system:

Creator/s. "Title". Type of source, duration. Date/date of consultation.
URL

Author-date system:

Creator/s. Date/date of consultation. "Title". Type of source, duration.
URL

 If the material is a recording of a speech or some kind of performance, information about the original source is attached. Depending on the information available, this information may be provided first or as supplementary information.

Example

Creator/s.	Gabilondo, Iñaki.
Date. (Author-date system)	19 de marzo de 2019.
“Title”.	“Me siento rejuvenecer”.
In	In
Website title.	<i>Cadena Ser. La voz de Iñaki.</i>
Type of document,	Video,
Duration.	2:25 min.
Date. (Notes and bibliography system)	March 19, 2019.
URL	https://youtu.be/Uo_ttOVDpRo

This is how the reference would be worded:

Notes and bibliography system:

Gabilondo, Iñaki. “Me siento rejuvenecer”. In *Cadena Ser. La voz de Iñaki*. Video, 2:25 min. March 19, 2019. https://youtu.be/Uo_ttOVDpRo

Author-date system:

Gabilondo, Iñaki. March 19, 2019. “Me siento rejuvenecer”. In *Cadena Ser. La voz de Iñaki*. Video, 2:25 min. https://youtu.be/Uo_ttOVDpRo

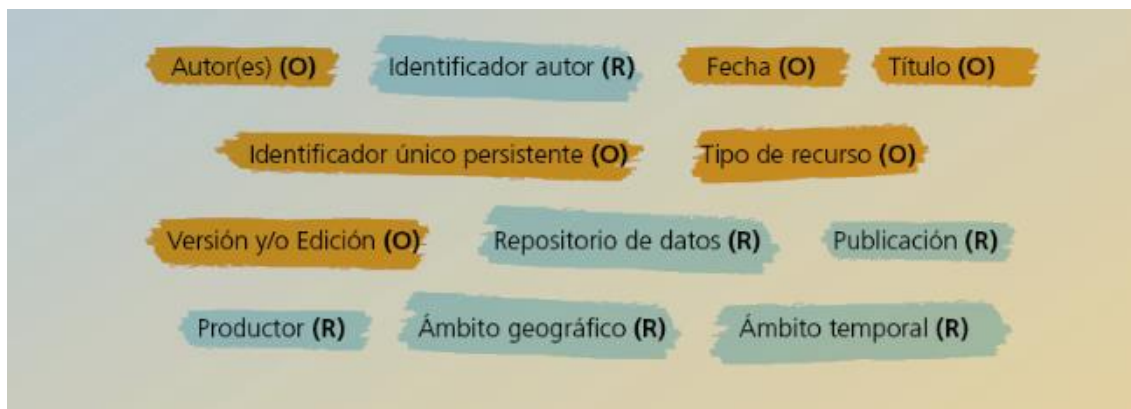

5.4. Research data

Research data are those materials generated or collected in the course of an investigation.

In recent years, the need and importance of correctly citing these datasets has become increasingly evident, since the data generated and/or used in a research project support the results of the research. In addition, citing these datasets will make them easier to identify, retrieve and include in platforms and resources and, ultimately, their dissemination and visibility.

The Chicago style does not contemplate, even in its latest editions (sixteenth and seventeenth), **citations and references to research data**, so to cite them we will have to follow other models, such as the one recommended by the University Libraries Network (REBIUN).

When we write the bibliographic reference of a dataset we must include some mandatory minimum elements (O) and other recommended elements (R) that we can combine to elaborate the reference according to the Chicago style. In the following image you can check what these elements are.

Following this model provided by the Network of University Libraries (REBIUN) and those proposed by some university libraries for the description of datasets, we could describe the schema that the reference of a dataset should have:

Notes and bibliography system (reference in note):

Note number. Author(s), "Title of the dataset", version (date in which the dataset was published or distributed), entity that produces/publishes/distributes/archives the dataset, locator or identifier of the dataset.

Example

5. Bethany Percha and Russ B. Altman, "A Global Network of Biomedical Relationships derived from Text", v. 7 (September 24, 2019), Zenodo, doi:10.5281/zenodo.3459420.

Notes and bibliography system (reference in the bibliography):

Author/s. "Title of the data set". Version. Date in which the dataset was published or distributed. Entity producing/publishing/distributing/archiving the dataset. Locator or identifier of the dataset.

Example

Percha, Bethany and Russ B. Altman. "A Global Network of Biomedical Relationships Derived from Text". V. 7. September 24, 2019. Zenodo. doi:10.5281/zenodo.3459420.

Author-date system:

Author/s. Date in which the dataset was published or distributed. "Title of the dataset". Version. Entity producing/publishing/distributing/archiving the dataset. Locator or identifier of the dataset.

Example

In the text:

We will thus demonstrate that the application provides automatic annotations of state-of-the-art text mining systems for genes, proteins, genetic variants, diseases, chemicals, species and cell lines (Percha 2019).

In the reference list:

Percha, Bethany and Russ B. Altman. September 24, 2019. "A Global Network of Biomedical Relationships Derived from Text". V. 7. Zenodo. doi:10.5281/zenodo.3459420.

6. How to order the bibliography or reference list

Full bibliography

The Chicago Manual of Style 17th edition generally recommends, when using the **notes and bibliography system**, a **full bibliography**, which includes all works cited, whether in text or in notes, other than personal communications. Some particularly relevant works the author has consulted may also be listed, even if not mentioned in the text. The usual heading is “Bibliography”.

Reference list

According to *The Chicago Manual of Style*, when we use the **author-date system** we will provide full details of the sources of our work in the **reference list**, usually titled “References” or “Works Cited”.

In a reference list entry, the year of publication is the second element, following the author’s name. Otherwise, a reference list entry is structured like an entry in a bibliography.

Unlike the entries in the bibliography, every entry in the reference list must correspond to a work cited in the text.

Placement

The bibliography or the reference list, depending on the system we are using, is normally placed at the end of the work, preceding the index, under the heading “Bibliography”, in the case of the notes and bibliography system, or “References” or “Works cited”, in the case of the author-date system.

Arrangement of entries

A bibliography or reference list arranged in a single alphabetical list is the most common and usually the most reader-friendly form for a work with or without notes to the text. All sources to be included are alphabetically arranged in a single list by the last names of the authors (or, if no author or editor is given, by the title or, failing that, by a descriptive phrase). Chicago recommends the letter-by-letter alphabetizing, but will accept the word-by-word system, which is closer to what some word processors produce.

Single or multiple authors. A single-author entry precedes a multi-author entry beginning with the same last name. Only the name of the first author is inverted.

Example

Redondo Sánchez, Pablo. *Experiencia de la vida y fenomenología en las lecciones de Friburgo de Martin Heidegger (1919-1923)*. Salamanca: Universidad de Salamanca, 2001.

Redondo Sánchez, Pablo, Fernando Martínez Llorca, Sebastián Salgado González and Francisco Javier Hernández González. *Diccionario de citas de filosofía: 12 conceptos fundamentales en sus textos*. Madrid: Maia, 2010.

Co-authors' last names. Successive entries by two or more authors in which only the first author's name is the same are alphabetized according to the coauthors' last names (regardless of the number of coauthors).

Example

Gómez-Chacón, Inés M., Julia M. **González**, Wolfgang Bosswick and Federico Besserer, eds. *Educación superior y retos de la cooperación internacional: migraciones y derechos humanos, interculturalidad y paz*. Bilbao: Universidad de Deusto, 2005.

Gómez-Chacón, Inés M. and Enrique **Planchart**, eds. *Educación matemática y formación de profesores propuestos para Europa y Latinoamérica*. Bilbao: Universidad de Deusto, 2005.

Successive references of the same author

For successive entries by the same author, editor, translator, or compiler, a **3-em dash** (followed by a period or comma, depending on the presence of an abbreviation such as ed.) replaces the name after the first appearance. Alphabetization is by title of work. Abbreviations such as *ed.* or *trans.*, which must always be included, do not influence the order of entries.

Example

Vidal Claramonte, África. *En los límites de la traducción*. Granada: Comares, 2005.

---, ed. *La feminización de la cultura: Una aproximación interdisciplinar*. Salamanca: Centro de Arte Contemporáneo, 2002.

---. *Traducir entre culturas: Poderes, diferencias, identidades*. Frankfurt: Peter Lang, 2007.

But:

Comaroff, Jean and John Comaroff, eds. *Modernity and Its Malcontents: Ritual and Power in Postcolonial Africa*. Chicago: University of Chicago Press, 1993.

Comaroff, John and Jean Comaroff. *Of Revelation and Revolution*. Chicago: University of Chicago Press, 1991-1997.

Alphabetizing

In a bibliography, titles by the same author are normally listed alphabetically. An initial *the*, *a*, or *an* is ignored in the alphabetizing. Note that all works by the same person (or by the same persons in the same order) —whether that person is editor, author, translator, or compiler— appear together, regardless of the added abbreviation.

Example 1 (Notes and bibliography system)

In the text:

Let us agree, then, that the agent —and here one can also include critique— may be constrained by language, by power, by the personal and cultural unconscious, and perhaps also by many other things.¹ Still, thanks to borrowings from both Marx and Freud, the agent has freedom within the realm of necessity. Moreover, even if the agent's freedom is an illusion, it is a powerful illusion, one that even a determinist cannot ignore when considering cultural formations.²

Therefore, rather than dismissing rhetorical performance as a myth, let us seek to better understand the perception of the question of the existence of “rhetorical intentions”.³ We will discover, I believe, that rhetorical intentions are, to some extent, predictable: they can be inferred from knowledge of role requirements and role dilemmas.⁴ This has been the impetus for my theorizing about the rhetoric of social movement leaders, and has extended it to the rhetoric of scientific research reports.⁵

Notes:

1. Vidal, *En los límites*, 90-91.
2. Bastin and Bandia, *Charting the Future of Translation*, 87.
3. Strunk and White, *Elements of Style*, 56-57.
4. Fernández Ramírez, *Enseñanza de la gramática*, 103-104.
5. Redondo, *Experiencia de la vida y fenomenología*, 127.

Bibliography:

Bastin, Georges L. and Paul F. Bandia, eds. *Charting the Future of Translation History*. Ottawa: University of Ottawa Press, 2006.

Fernández Ramírez, Salvador. *La enseñanza de la gramática y la literatura*. Edited by José Polo. Madrid: Arco Libros, 1985.

Redondo Sánchez, Pablo. *Experiencia de la vida y fenomenología en las lecciones de Friburgo de Martin Heidegger (1919-1923)*. Salamanca: Universidad de Salamanca, 2001.

Strunk, William and E. B. White. *The elements of Style*. 4th ed. New York: Allyn and Bacon, 2000.

Vidal Claramonte, África, ed. *En los límites de la traducción*. Granada: Comares, 2005.

Example 2 (Author-date system)

In the text:

Let us agree, then, that the agent—and here one can also include critique— may be constrained by language, by power, by the personal and cultural unconscious, and perhaps also by many other things (Vidal 2005, 90-91). Still, thanks to borrowings from both Marx and Freud, the agent has freedom within the realm of necessity. Moreover, even if the agent's freedom is an illusion, it is a powerful illusion, one that even a determinist cannot ignore when considering cultural formations (Bastin and Bandia 2006, 87).

Therefore, rather than dismissing rhetorical performance as a myth, let us seek to better understand the perception of the question of the existence of “rhetorical intentions” (Strunk and White 2000, 56-57). We will discover, I believe, that rhetorical intentions are, to some extent, predictable: they can be inferred from knowledge of role requirements and role dilemmas (Fernández Ramírez 1985, 103-104). This has been the impetus for my theorizing about the rhetoric of social movement leaders, and has extended it to the rhetoric of scientific research reports (Redondo 2001, 127). Caught between the pressures to “tell it like it is” and “for showing one's best self”, I have hypothesized that a supreme test of the researcher is the ability to appear to “tell it like it is” while at the same time “showing one's best self” (Notario 2005, 93-94).

7. Conclusion

In this lesson we have described the characteristics of one of the main citation styles, the Chicago style, with its two citation systems:

- The notes and bibliography system.
- The author-date system

With this lesson we intended you to know:

- How to cite within the text according to the two systems of the Chicago style.
- How to write the bibliographic references in note—in the case of the notes and bibliography system— of different types of documents.
- How to write the complete bibliographic references of different types of documents that will make up the bibliography or the final reference list.

More information

You can find the [English](#) and [Spanish](#) versions of *The Chicago Manual of Style* in the UA Library catalogue.

You can also find frequently asked questions, quick guides and forums where you can share with other users your doubts and questions about this citation style on the [Chicago style website](#) and on its [Facebook](#) and Twitter profiles.
